Atlantic Doors & Hardware, Inc.
4601 10th Avenue No.
Lake Worth, FL 33463

My name is Rick Motter, I am the Project Manager for all projects that our company, James S. Lavold, Inc., contract with the FAA across the US and throughout the Caribbean. We have completed numerous projects since 1996 that include many critical and sensitive upgrades at Air Traffic Control Towers that require extreme coordination, supervision and communication.

The reason for this letter is to express our sincere thanks and to take this opportunity to convey our complete confidence in Mr. Sean Foley and his team of professionals at Atlantic Door & Hardware who we consider an essential partner in all our projects.

From one single door opening to a hundred, ADH has always demonstrated total commitment to our needs with professionalism, integrity and honesty. The employees of ADH are always quick to assist in any situation, large or small.

All personnel from our company involved with numerous projects over the years felt the need to express our sincere thanks to Mr. Foley, and all the extremely accommodating staff for their total cooperation making normally difficult projects seamless successful experiences.

It is not often that you encounter this level of cooperation with such genuinely nice people. Credit should go where it is deserved and we all at JSL, Inc. highly recommend ADH for all door and hardware needs.

Again my appreciation,

Sincerely,

Rick J. Motter Jr.
Project Manager
JSL General Contractors, Inc.
